

UMET9U-30-1- Professional Skills for Banking and Finance

Tutorial 9: Statistics and data analysis

1. The two ogives below relate to the relative performance of males and females on a stats test.

Use the diagrams to draw box plots describing the distributions of the two variables and comment on your findings.

2. Draw a histogram for the following exam marks data:

47	40	75	50	34	50	50	60	45	51	29	45	60
68	19	21	50	40	63	62	61	56				

3. Draw the histogram corresponding to the following ogive, using frequency density on the vertical axis:
